Cross Stitch *School*

Easy Way to Make Your Borders Line-Up

There is nothing worse than getting to the end after stitching your border and discovering your border doesn't line up! On today's video I am sharing a method I use to make sure my borders always line-up. It hasn't failed me yet!

Tips:

1. Look at the middle, right side of your design and cross-reference on your chart. Count over as many squares shown on the chart and then make the first cross stitch X to begin your border.

2. Go to the top center of your design and cross-reference on your chart. Count up as many squares shown on the chart and then make the first cross stitch X for the top border.

3. Continue to add stitches along the top and right side of your design to assure the top right corners come together perfectly.

4. Repeat these steps on the far left and bottom left of your design.

5. Continue to stitch the entire border until complete.

Congratulations! You did it!
